PRODUCT BRIEF

Arlabs Kira Kira

Cloud accounting built for Malaysian businesses — record sales and costs in seconds, send professional invoices, track what you are owed, and stay ready for LHDN e-Invoice. Simple mode for small traders, full accounting for growing companies.

ARLABS

ACCOUNTING PRODUCT

What it delivers

- ✓ Two modes — simple tracking or full accounting, one app
- ✓ Invoices, quotations, stock and bank reconciliation
- ✓ Built for Malaysia — SST, SSM, TIN and LHDN e-Invoice ready
- ✓ Works in any phone or computer browser, nothing to install

Who it is for

Organisations whose work is recorded by many people across offices, sites and the field, and must be verified, reported and audited.

> IN PRACTICE
>
> A stall owner records takings in two taps; a growing Sdn. Bhd. on the same app issues SST invoices, reconciles the bank and exports profit and loss — without changing product.

At a glance

Modules	10, individually enablable
Channels	Web dashboard · iOS · Android
Offline	Field capture syncs when signal returns
Access control	Role-based, enforced at database level
Audit	Every action logged with user and time
Languages	English · Bahasa Malaysia
Timezone	MYT, Malaysian holiday rules
Exports	PDF · Excel · REST API

Built with

React · Supabase · PWA / mobile · EN / BM

MODULES

10 modules, one connected system

Every module shares the same identity, access, notification and audit layer. Start with the modules you need and enable more over time.

Simple Tracking
Record what you sold and what you spent.

Invoicing & Quotations
Invoices, quotes and credit notes that look professional.

Getting Paid
Know what's owed and chase it in one click.

Products & Stock
Track what you sell and what's left.

Bank Reconciliation
Match your books to your bank statement.

Reports & Insight
The numbers, in plain language.

Malaysian Compliance
Built for Malaysia, not adapted for it.

Team & Permissions
Your team, your rules.

Two Modes, One App
Start simple. Switch later. Keep everything.

Works Anywhere
Nothing to install.

How we work with you

Build & run
Hosted service — we deploy, configure, train and support.

Custom build
Extend or add modules to your scope on a fixed plan.

Managed support
SLA-backed maintenance and enhancements.
