SOLUTION BRIEF · BY INDUSTRY

Arlabs for Professional Services

CRM, projects and back-office for services firms.

The challenge

Services firms need clients, projects, documents and finance connected without heavy enterprise software.

How Arlabs helps

- ✓ Manage clients, documents and approvals in one place
- ✓ Track project delivery and reporting
- ✓ Handle claims, advances and payroll

In practice

> EXAMPLE
>
> A firm manages client records and approvals, tracks project progress, and reconciles claims and payroll.

Why it works

Work is captured where it happens, verified before it counts, and reported from one trusted record. Every product runs on the same stack, so modules can be combined and extended as the operation grows — without a rip-and-replace later.

RECOMMENDED PRODUCTS

Products that fit

Recommended starting points for professional services — each is a complete product on its own and integrates with the others.

FLAGSHIP PRODUCT

Arlabs CRM & Operations

8 modules

Getting started

1 · Scope

A short discovery session to map your workflows, roles and sites to modules.

2 · Pilot

One workflow with one team, proving verified daily data and reporting.

3 · Roll out

Train users, migrate data and expand module by module with support.

Product whitepapers and briefs for each recommended product are available in the Arlabs resource centre.
